Quarry operations have a profound affect on air contamination. Dust from quarrying can be found around the quarry and road where it is transported. Worse yet, the most dangerous particulate is transmitted for several miles. This small particulate lodges in lungs and can cause long term chronic medical problems.

This video (taken in 2008) depicts the blasting, quarry dust and noise at the Highway Materials quarry in Green Lane, PA and its effect on bordering homeowners. Open the following link to see view the video:
